

## About CMA

The US CMA (Certified Management Accountant) certification is a global benchmark for management accountants and financial professionals, primarily because CMAs can explain the “why” behind numbers, not just the “what”. Achieving the CMA demonstrates your professional expertise in financial planning, analysis, control, decision support, and professional ethics – skills that are in demand by organizations around the world. The course gives you an aptitude to generate meaningful insights out of raw data. This further gives you greater credibility, higher earning potential and ultimately a seat at the leadership table.

CMA is offered by the IMA (Institute of Management Accountants), US, and is a globally recognized, advanced-level credential appropriate for accountants and financial professionals in business. The CMA exams comprise the following two exam parts:

- **Part 1 – Financial Reporting, Planning, Performance & Control**
- **Part 2 – Financial Decision Making**

### Why 2 exams for US CMA vs. many exams on Indian professional qualifications?

US professional qualifications mandate a university degree, and given the fact that university education covers a vast majority of the content, the professional exam only focuses on the skill-gaps which are needed for the profession. Therefore, US professional qualifications like CMA “complement” university education and have lesser number of exams.

On the contrary, Indian professional qualifications (like Indian CA, CMA, CS, etc.) do not require university education. Therefore, these qualifications tend to “substitute” university education and have more exam papers to encompass what a candidate would have covered (or simultaneously covers) in a university degree.

### Few of the organizations where CMAs are employed in India include:

- Accenture
- AIG
- Genpact
- EY
- KPMG
- Deloitte
- PwC
- Johnson & Johnson
- Caterpillar
- VMware
- Flextronics

- TE Connectivity

## About IMA

IMA® (Institute of Management Accountants) is one of the largest and most respected associations of accountants and financial professionals in the business. It serves as the apex governing body for the US CMA certification.

Ever since its inception in 1919, IMA has been committed to empowering its 100,000+ members—and those throughout the rest of the profession—to strengthen on-the-job skills, better manage companies, and accelerate careers.

IMA is present globally with offices in the US, Europe, Middle East, China and Singapore, and members across 140+ countries. In India, IMA works in collaboration with Wiley (global partner for official IMA study materials) and Miles Education (India's largest training provider for CMA) to help you prepare for the US CMA exams.

## About Miles

Miles Education upskills students and professionals across the world to help them be future-ready and enable their career progression. Miles provides skills-based training in finance and accounting, marketing, leadership and strategy, human resources, data analytics, information technology, artificial intelligence, and robotics.

## About B.Com (H) /BBA with CMA

B. Com (Honours) integrated with CMA USA is integrated with US CMA (Certified Management Accountant) curriculum. Candidates would cover the CMA content in Semesters 1, 2 and 3, and would be prepared to appear for two-part CMA exams in Semester 4. This is an **opportunity for you to clear the CMA exams even before graduation** - the CMA qualification will set you apart from others who have a university degree alone, and is **recognized by top MNCs in India and across the world**. CMA is offered by the IMA (Institute of Management Accountants), US, and is a globally recognized, advanced-level credential appropriate for accountants and financial professionals in the business.
